

COURSE TITLE : FIRE SAFETY MANAGEMENT TRAINING

INTRODUCTION

Fire remains potentially the most damaging and disruptive event that any business has to face. Virtually every fire will result in disruption to workflows inevitably leading to loss of productive activity, orders, customers and jobs. A significant number of businesses simply never recover from the effects of a large fire

Effective fire safety management is a key element in the overall fire safety of a building and its occupants. Managers need to plan effectively to combat the potentially disastrous effects of a fire in their building, and to meet the many requirements placed upon them by various fire legislations applicable to occupied buildings of all types and uses.

This can be an extremely complex and time consuming task, which is usually only one of many competing priorities facing today's busy Manager.

This course can assist those responsible for fire safety in buildings by providing valuable information on all aspects of fire safety management

COURSE OBJECTIVE

Upon completion of the course, delegates will be able to:

- Understand the chemistry and destructive nature of fire
- Comprehend the principles of fire safety management
